About Myself:-

I'm a third-year B.Tech engineering student passionate about building user-centric, functional web applications. I have experience developing full-stack projects using Python, Flask, React, JavaScript, and more. I'm driven by curiosity and love transforming concepts into impactful digital solutions.

Education:-

B.Tech in Computer Engineering
D.Y. Patil College of Engineering, Kolhapur
Expected graduation: 2026

Diploma in Computer Engineering
SIT College, Kolhapur
Completed: 2023

Skills:-

- **Languages & Frameworks**: Java, Python, JavaScript, HTML, CSS

- **Web & Backend**: Flask, React, SQLite

- **Tools & Concepts**: Full-stack development, Responsive Design, CRUD systems, Chart.js

- **Virsion Control:** Git, Github & DevOps

Projects:-

Trading Journal App
Python + Flask web app to log and analyze trades using SQLite and Chart.js.

Student CRUD App
Full-featured Flask-based app to manage student records with complete CRUD functionality.

Portfolio Website
A responsive personal portfolio built using React, Javascript and CSS—live and fully functional.
